

NDI Converter Supporting HDMI Sources

NewTek Spark™ Plus are portable, affordable UHD 60p to NDI® video converters. Capturing video directly from the connected camera or device and converting it to high bitrate NDI®, a Spark Plus device is the fastest, easiest, and most flexible way to acquire up to a UHD 60p video source from anywhere on the network and integrate it into your IP-based video production workflows.

Newtek Spark Plus offers all types of media production professionals a quick and easy solution that does not require technical expertise, or an enterprise-level network infrastructure to use up to UHD 60p video in IP based media production workflows. Spark Plus is compatible with hundreds of systems, devices, and applications that support innovative Network Device Interface technology and is ideal for live production, streaming, sports, competitive and social gaming, corporate communications, classroom production, and more. Say goodbye to cost, cables, capture or display cards, and confusion.

- Pristine UHD Video**
 Capture broadcast-quality ultra high definition video with native support for resolutions up to 2160p 60 with simultaneous video loop out
- IP Based Production**
 Deliver video to the network with NDI® through HDMI connectivity for integrating with professional video equipment, or consumer cameras, game consoles, and everyday A/V gear.
- Simple Connectivity**
 Connect to the network and transmit video with a single Ethernet cable.
- Tally Indicator**
 Easily recognize when the source is on Program or Preview.
- Web Interface**
 Configure settings and monitor video from the browser of any networked computer or mobile device with an intuitive, Web-based user interface.
- Software Driven**
 Integrates with live production systems from NewTek and other manufacturers, as well as software applications to easily satisfy a variety of production requirements.
